TALLER DE DEEP LEARNING

Lectura 0: Introducción a Inteligencia Artificial y Deep Learning

En 1956, John McCarthy acuñó la expresión «inteligencia artificial», y la definió como «la ciencia e ingenio de hacer máquinas inteligentes, especialmente programas de cómputo inteligentes».

A.M. Turing Award Winners by Year: https://amturing.acm.org/byyear.cfm

Artificial Intelligence

Any technique which enables computers to mimic human behavior.

Machine Learning

Subset of AI techniques which use statistical methods to enable machines to improve with experiences.

Deep Learning

Subset of ML which make the computation of multi-layer neural networks feasible.

Visual Cortex

(Its Structure is Instructive and Inspiring)

Figure 3. Example results by our proposed StackGAN, GAWWN [20], and GAN-INT-CLS [22] conditioned on text descriptions from CUB test set. GAWWN and GAN-INT-CLS generate 16 images for each text description, respectively. We select the best one for each of them to compare with our StackGAN.
